PROFILE

Full-stack developer with 12+ years building web and mobile products, from LAMP and WordPress to TypeScript monorepos with React, Next.js, React Native and Node. I spent several years leading delivery (Mercado Libre, IURCO), so I write code with the whole picture in mind: scope, trade-offs, tests and production. In 2026 I'm back to building hands-on: I designed and shipped my own product, Tino, end to end (Expo/React Native PWA, Next.js admin, Supabase with Edge Functions, Mercado Pago payments) and I own the repo, CI/CD and infrastructure of a client marketplace (NestJS, Next.js, PostGIS, Docker). I work daily with AI coding agents (Claude Code) inside a disciplined workflow: planning before code, small PRs, tests and CI as merge gates. Looking for remote full-stack or senior frontend roles.

TECH STACK

Languages
TypeScript · JavaScript · PHP · SQL · Python · Go (working knowledge)

Frontend
React · Next.js (App Router) · React Native / Expo · Astro · Tailwind CSS · PWA

Backend & data
Node.js · NestJS · Supabase (Postgres, RLS, Edge Functions) · Prisma · PostgreSQL / PostGIS · DynamoDB · MySQL · REST / OpenAPI

Cloud & DevOps
AWS (Lambda, DynamoDB, S3, Cognito, EC2, Amplify) · Docker · GitHub Actions CI/CD · Cloudflare Pages · Vercel · Firebase Hosting · Sentry

Testing
Vitest · Playwright (e2e) · pgTAP

Commerce & CMS
Mercado Pago (Checkout Pro, webhooks, subscriptions) · Adobe Commerce (Magento 2) · WooCommerce · WordPress · Drupal · CodeIgniter

AI-assisted development
Claude Code (agents, skills, hooks) · Claude API · OCR + LLM content pipelines

EXPERIENCE

Tino (own product) — Founder & Full-Stack Developer

2026 – Present

Spaced-repetition study app for law students and licensing courses (estudiantino.com.ar). Built solo, idea to production in about 2 months, in an npm-workspaces TypeScript monorepo.

- `App` Expo / React Native app with Expo Router, shipped as an installable PWA (service worker, offline-friendly caching); spaced-repetition engine (ts-fsrs) in a shared core package tested with Vitest.
- `Backend` Supabase: Postgres schema with row-level security, migrations and 30 pgTAP test suites; Edge Functions for Mercado Pago one-time and subscription payments (validated webhooks) and transactional emails.
- `Web` Admin panel in Next.js 16 + Tailwind v4 (catalog, content review, students, reports, pricing) and an Astro landing site on Cloudflare Pages with one SEO page per subject.
- `Data` Python pipeline (Docling, OCR) that turns textbooks into question banks with AI generation and human review.

Pipa Code Studio — Co-founder · Tech Lead / PM

2026 – Present

Software studio. On **Carn.AR**, a meat marketplace MVP for a 4-branch butcher chain, I own the repo, infrastructure and CI, and coordinate 2 full-stack developers.

- `Stack` Turborepo + pnpm monorepo: NestJS REST API with OpenAPI and a generated typed client, Prisma, PostgreSQL/PostGIS, Next.js 16 storefront and admin, shared zod schemas.
- `Infra` Docker Compose environments, Caddy, MinIO, automated Postgres backups, server provisioning, GitHub Actions CI/CD, Sentry and uptime monitoring.
- `Workflow` Conventional Commits, small cross-reviewed PRs, and shared rules, skills and hooks so each developer's AI agent plans before coding.

ALSO

Delivery
Agile / Scrum · Kanban · Jira · GitHub Projects · Roadmapping · Stakeholder management · Hiring & coaching

IURCO — IT Project Manager

2024 – 2025

Software factory. Led delivery of several client projects, working closely with each team on solution design.

- 2025 — Led a 6-developer team building a from-scratch Adobe Commerce (Magento 2) platform for a leading consumer-electronics retailer in Argentina, with SAP and Google BigQuery integrations. Launched on schedule with 100% of scope.

Mercado Libre — IT Project Leader (Team Lead)

2022 – 2024

Led a development team in the shipping unit across the full software lifecycle under Agile/Scrum, defining technical solutions together with the tech lead. Stack: Go and SQL services on Fury, Mercado Libre's internal cloud platform built on AWS services, with Sentry monitoring and Jira. Also owned hiring and performance for the team.

- 2024 — Analyzed level-2 metrics and designed solutions with the team, improving core metrics by 30% in one quarter.

Serfe — Senior Developer / Project Manager

2018 – 2022

Senior developer and team lead on 3 concurrent projects with teams of up to 6 developers. Owned AWS setup (Amplify apps, repositories, automated testing) enabling CI/CD.

- 2022 — Everprep: beta launch of a large multi-tenant study platform on AWS + React (Lambda, DynamoDB, S3, Cognito, Amplify). Published to the App Store and Google Play. Gave the company's internal AWS Amplify training.
- 2021 — 45R: built and launched a WooCommerce store.
- 2020 — Bluejacketeer: web app redesign and a new React Native mobile app, published to the App Store and Google Play.
- 2019 — Metro-Manhattan: built and launched a real-estate website.

Freelance — Web Developer

2017 – 2018

SIGE, a records-management web app for Santa Fe's Regional IV Education authority (PHP/CodeIgniter, MySQL, jQuery): requirements, development, deployment and staff training. Patrone Equipamientos: WordPress showroom with digital-marketing setup.

Serfe — Full-Stack Developer

2014 – 2017

Requirements analysis, estimation and development of web projects in PHP, JavaScript and SQL with Drupal, WordPress, Joomla, CodeIgniter, jQuery and Bootstrap on LAMP servers, using Git.
